

# NANO PROTECH

## Electric

- A Super Hydrophobic (water repellent) coating for powerful electric and electronic insulation against moisture.
- Long lasting protection - up to 1 year.
- Easy application via spray-mechanism.
- Quick drying.
- Cures within minutes.
- 256kV resistance.
- 250°C heat resistance.
- 100% moisture displacement within 10 seconds.

### Ideal Usage:

- Motors
- Cables
- Switches
- Starters
- Lights
- Circuit boards
- Pumps
- Telecommunication systems

Long lasting protection for all conductive components
